Increase charge-offs.
During 2010, Horicon Bank charged off approximately \$3.4 million of balances concentrated primarily in loans to businesses adversely affected by a prolonged contraction in economic activity.
Purchase another financial institution or purchase assets from another financial institution.
Our stable financial condition allowed us to purchase a small branch in our market which was being sold by a bank exiting this area.
Held as non-leveraged increase to total capital.
During 2010, approximately \$3.3 million of CPP funds were down streamed to Horicon Bank. Approximately \$3.7 million remains
available for future contributions and which may be considered as a non-leveraged amount available if needed.
aradase is ratare contributions and which may be considered as a non-reversigned amount available in records.

NAME OF INSTITUTION (Include Holding Company Where Applicable)

What actions were you able to avoid because of the capital infusion of CPP/CDCI funds?	
The capital infusion of CPP funds enabled us to avoid significant contraction in our business lending activity.	The added capital provided us
with an opportunity to continue serving our local communities with loans to businesses.	

NAME OF INSTITUTION (Include Holding Company Where Applicable)

What actions were you able to take that you may not have taken without the capital infusion of CPP/CDCI funds? Because we have a strong capital position due to the CPP, we were able to keep our business model in place. This model emphasizes sound			
			business lending in our local markets. The CPP enable us to cope with higher than normal charge-offs due to the economic slowdown, and it
enabled us to build our reserves appropriately without cutbacks in banking services.
